[Portfolio](#)

Objective

- Driven final-year student seeking entry-level opportunities where I can apply technical skills in building practical projects while leveraging strong interpersonal, communication, and coordination skills in student mentoring and collaborative environments.

Education

SR University , Bachelor of Technology in Computer Science	October 2022 – July 2026
• GPA: 8.8/10.0	
Alphores Junior College , Intermediate	October 2020 – July 2022
• Percentage: 90.5	
Saketha High School , SSC	March 2019 - 2020
• GPA: 10/10	

Experience

Loopync Private Limited	Jan 2026 - Mar 2026
• Worked as an AI Intern at Loopync Private Limited for 2 months, where i have worked on a project named Redirection AI , which is an AI based chatbot for emotional support to a human.	
AICTE Virtual Internship	Jan 2024
• The AICTE Google AIML Virtual Internship is a two-month online program in which participants work on real-time projects over a period of time.	
AWS Virtual Internship	Jul 2024 - Sept 2024
• The AWS academy offered a virtual internship where students are encouraged to develop their skills by learning from the online courses and working on online projects over time.	

Skills

Programming Skills: Java, Python, C

Web Technologies:HTML, CSS

Database: SQL

Tools & Technologies: Git, Github, Visual Studio Code

Soft Skills: Communication, Teamwork, Leadership, Analytical Thinking, Commitment, Adaptability

Projects

Sensor based parking assistant system Sensors, Arduino IDE	Nov 2025
• Designed and developed an autonomous parking assistance system using ultrasonic sensors and motor controllers.	
• Implemented real-time obstacle detection with visual and audible alerts to improve vehicle safety.	
• Wrote clean and modular Arduino code to enhance system performance, maintainability, and scalability.	
Voice Assistant Python, SpeechRecognition, Pytsx3, WikipediaAPI	Aug 2025
• Developed a Python-based voice assistant capable of executing commands such as playing YouTube music, providing date and time, telling jokes, and retrieving Wikipedia information.	
• Integrated Speech-to-Text using Google Speech Recognition API and Text-to-Speech using pyttsx3 for real-time interaction.	
Playfair Simulation and Steganography HTML , CSS , Cryptography	Apr 2025

Techniques

- Developed a front-end cryptography application implementing Playfair cipher for text encryption and steganography for image encryption and decryption.
- Designed a responsive and user-friendly interface for secure data handling.

Netflix | HTML , CSS

Sep 2023

- Built a responsive and visually appealing Netflix homepage clone using clean and accessible HTML and CSS code.

Agribot | Sensors , C , Arduino IDE

Jan 2023

- Developed an automated agriculture robot capable of sowing seeds efficiently to reduce manual labor.
- Demonstrated practical use of sensors and embedded systems for smart farming solutions.

Achievements

- Served as USG – Disciplinary Committee at SRUMUN'25, where I led a 50-member team and was formally appreciated for successful event execution of a 1500 participant conference.
- Appointed Scribe for the Lok Sabha Council at SRUMUN'24, leading council operations and formal sessions for 120 delegates, with formal recognition awarded for exemplary performance.
- Led a team in an Inter-College Hackathon at SR University using Blockchain Technology; secured 4th place among 50+ teams.
- Led the organization of the school Annual Day, managing planning, coordination, and execution for an event attended by 500+ participants and was formally recognized for organizational excellence.
- Received multiple prizes and certificates in essay writing competitions during schooling, highlighting strong written communication, analytical thinking and creativity.

Certifications

MICROSOFT | Azure AI Fundamentals.

CISCO | Networks, Cybersecurity and Wireless essentials.

AWS | Cloud Foundations and Data Engineering.

NPTEL | Theory Of Computation.
