Objective

- A passionate Computer Science undergraduate seeking opportunities in software development where I can apply my programming and problem-solving skills, gain real-world experience in building scalable web applications, and contribute to the growth of the organization while continuously enhancing my own professional development.

Education

SR University , Bachelor of Technology in Computer Science	October 2022 – July 2026
• GPA: 8.98/10.0	
Alphores Junior College , Intermediate	October 2020 – July 2022
• Percentage: 90.5	
Saketha High School , SSC	March 2019 - 2020
• GPA: 10/10	

Experience

AICTE Virtual Internship	Jan 2024
• The AICTE Google AIML Virtual Internship is a two-month online program in which participants work on real-time projects over a period of time.	
AWS Virtual Internship	Jul 2024 - Sept 2024
• The AWS academy offered a virtual internship where students are encouraged to develop their skills by learning from the online courses and working on online projects over time.	
LOGICWHILE Offline Internship	Dec 2024
• This is an offline python inter-college internship conducted by Logicwhile company in SR University over 60 hours of time in the span of 10 days to make students work on real-time applications using python.	

Skills

Technical Skills: C, Python, Java, Visual Studio, HTML, CSS

Soft Skills: Commitment, Communication, Leadership, Teamwork, Analytical thinking, Blog writing

Projects

Voice Assistant Python, SpeechRecognition, Pytsx3, WikipediaAPI	Aug 2025
• Developed a Python voice assistant. Reacts to user commands such as playing songs on YouTube, telling a joke, giving you the date and time, and accessing Wikipedia.	
• Linked Speech-to-Text to the Google SpeechRecognition API and Text-to-Speech with pytsx3. This enables real-time communication.	
• Embedded the project in a virtual environment that is portable and very easy to establish.	
Playfair Simulation and Steganography HTML , CSS , Cryptography Techniques	Apr 2025
• Developed a front end project under cryptography .	
• Created a responsive front end interface of text and image encryption using playfair cipher for text encryption and steganography for the image encryption and decryption.	
Netflix HTML , CSS	Sep 2023
• Developed a front end page to show the home page of netflix .	
• Constructed visually appealing demo of Netflix homepage utilizing HTML, CSS which employed clean code,	

HTML and an accessible design.

Agribot | Sensors , C , Arduino IDE

Jan 2023

- Developed an Automatic Seed Sowing Agriculture Robot namely "Agribot" which automatically sows the seeds making a farmer's work easier.
- This bot is a demonstration of how technology helps farmers. Here, electronic components and sensors are used to build the bot and the C language is used to implement the code.

Achievements

- Led the council, **Lok Sabha**, as the Scribe, which was the newly introduced council for the first time in SRUMUN'24 and was recognized for the role as the Scribe.
- Led a team in the Inter-College Hackathon conducted by SR University, using Block Chain Technology to develop a secure and transparent supply chain solution; secured fourth place out of 50+ participating teams.

Certifications

MICROSOFT | Azure AI Fundamentals.

CISCO | Networks, Cybersecurity and Wireless essentials.

AWS | Cloud Foundations and Data Engineering.

NPTEL | Theory Of Computation.
